

If you are:

- A sophomore planning to apply to become a Class of 2021 Clare Boothe Luce Scholar
- Intending to major in **Geosciences**
- A US citizen
- Looking for possible research projects for summer 2019 through the Geosciences department,

Then please:

1. Email Prof. Bud Wobus (rwobus@williams.edu), CBL departmental representative for geosciences, to let him know of your plans.
2. Fill out the general CBL application form (see CBL webpage), and submit to Dawn Schoorlemmer (ds10@williams.edu) on or before the February 8th deadline.
3. Check out the geosciences department website regarding summer research projects, <http://geosciences.williams.edu/student-resources/student-opportunities/>
4. Make contact with geosciences faculty members to find out more about their research projects, and let them know of your interest in summer research.
5. By **the CBL deadline of February 8th**, contact the geosciences faculty member you are interested in working with, letting him/her know that you have applied for the CBL scholars program.

You may apply to be a CBL scholar through more than one of the target departments, so please read the materials for each major/discipline through which you are planning to apply.

If you are interested in doing another off-campus research program the summer after your junior year, you can still apply to CBL! Even if your CBL scholar's application is unsuccessful, there is still a good chance of a summer science research position in the geosciences department. Decisions and offers for both the CBL scholars program and general summer research positions will occur by early March.

Please get in touch if you have any questions!

Prof. Bud Wobus
Geosciences Department
